

IMPROVE YOUR WORKPLACE COMMUNICATION WITH DIGITAL SIGNAGE

Digital signage for internal communications is becoming a necessary tool as it provides a unique platform for engagement while they're not sitting at their desk. As BYOD and the movement of a more mobile workforce have taken over the modern office, you need to find new and innovative ways to communicate quickly and impactfully.

BE DRIVEN BY YOUR DATA

With Secure Dashboards you'll be able to deliver up-to-date business metrics securely to your teams at any scale.

- PowerBi
- Sharepoint
- Tableau
- Grow
- DataDog
- Monday.com
- Trello
- Geckoboard

Plus an almost unlimited range of authenticated dashboards.

COMMUNICATION IS KEY

Communicating with your workforce via digital signage is a powerful tool. Utilise our scheduling, publishing, and layout designer to create the perfect communication workflow for your content managers and your viewers.

Pull content from our free Marketplace such as Weather, Clocks, Apps, Noticeboards, and Calendar apps or design your own.

Plan your content strategy with our advanced scheduling and enterprise-focused platform tools.

“Great company to work with and meets the needs of our company Better communications with employees.”

Charlie H

BUILT FOR SCALE

Your digital signage can do more to communicate with your staff and customers. Create a digital signage experience with the ability to scale to 1000's of devices, managed completely remotely by your team.

Utilise Granular User Permissions, Local playlist management, Player tagging, and more to simplify the content distribution process.

We're focused on creating the most user friendly, scalable and enterprise-focused digital signage CMS.

ENTERPRISE TOOLS AT YOUR DISPOSAL

Digital signage is more than just delivering content to your screens. You need a robust feature set of tools at your disposal. SSO, Granular User Permissions, Proactive monitoring, Emergency messaging, Proof of play, and more features are available with Signagelive.

2 FACTOR AUTHENTICATION

I like how easy it is to use, the training you are provided with really is useful and easy to follow, and the team at Signagelive is super helpful and so swift at responding to calls for support and resolution of queries.

Teri H

The simple Dashboard layout provides easy and meaningful status info for devices on site. Creating Layouts and playlists is simple and content tagging brings this platform in line with the best CMS's out there.
