

SECURE DASHBOARDS

Don't risk publishing your company data via unsecured URLs or adding layers of hardware to achieve your secure dashboard delivery.

Secure Dashboards allow you to configure an unlimited number of dashboards from a vast selection of applications. Deliver dashboards securely via Signagelive to specific players via your playlists. The Smart login process allows you to configure a range of dashboards from one login credential allowing you to build and expand your Secure Dashboard delivery to any scale.

PERFECT FOR:

Any workplace communication that's looking to update their staff on latest metrics, dashboards, data sources and more! Configure how often your dashboards update and what players receive the content.

REQUIREMENTS:

To create a simple, scalable and secure way to deliver sensitive dashboard data to Signagelive players while being able to configure the intervals that content is being updated.
