

# MAXIMISE THE IMPACT OF YOUR CORPORATE DIGITAL SIGNAGE WITH SIGNAGELIVE

Step up your corporate communications strategies with scalable, ultra-secure cloud-based digital signage.

With Signagelive, you can boost engagement, productivity and collaboration, while optimising the efficiency of your content management process.

Seamlessly manage people, groups, screens and content, all from a single platform.

With Signagelive, you can securely roll out content management responsibilities across every team, assigning different levels of user access, based on an employee's job role and seniority, while still enabling managers to grant one-off user permissions for any staff.

Go big with your content plans and securely deliver everything from multinational data vision strategies to multimedia video wall campaigns and interactive employee experiences.

Signagelive data integrations, like Secure Dashboards, make it quick, easy and secure to roll out your data company-wide. In near real-time, you can display on-screen password-protected data dashboards and reports from any business intelligence tool, including Microsoft Power BI, GROW and Monday.com.

### 24/5 SUPPORT

We're here to support you around the clock, 24/5, with an experienced and widely acclaimed technical support team that you can reach online.

### PERSONALISED CONTENT MANAGEMENT

Custom-build a solution that works for your organisation with our portfolio of products, which includes a range of licences and support options, as well as individual add-on modules and services.

### API FIRST DEVELOPMENT

Everything Signagelive has to offer is accessible through our APIs, so if you'd like to develop a customised solution, Signagelive can be the engine that drives you forward.
